

Elliptic Functions (Grundlehren der mathematischen Wissenschaften)

By Komaravolu Chandrasekharan

Elliptic Functions (Grundlehren der mathematischen Wissenschaften) By Komaravolu Chandrasekharan

This book has grown out of a course of lectures on elliptic functions, given in German, at the Swiss Federal Institute of Technology, Zurich, during the summer semester of 1982. Its aim is to give some idea of the theory of elliptic functions, and of its close connexion with theta-functions and modular functions, and to show how it provides an analytic approach to the solution of some classical problems in the theory of numbers. It comprises eleven chapters. The first seven are function-theoretic, and the next four concern arithmetical applications. There are Notes at the end of every chapter, which contain references to the literature, comments on the text, and on the ramifications, old and new, of the problems dealt with, some of them extending into cognate fields. The treatment is self-contained, and makes no special demand on the reader's knowledge beyond the elements of complex analysis in one variable, and of group theory.

Editorial Review

Review

"...In the breadth, depth and inevitability of treatment of this beautiful material, the author has made a contribution to the mathematical community consistent with the distinction of his career. That he has succeeded in compressing this treatment into a succinct monograph of fewer than 190 pages is a testament to his taste, discipline and powers of exposition."-- MATHEMATICAL REVIEWS

Users Review

From reader reviews:

Ida Resler:

Do you considered one of people who can't read gratifying if the sentence chained inside the straightway, hold on guys this kind of aren't like that. This Elliptic Functions (Grundlehren der mathematischen Wissenschaften) book is readable by simply you who hate the straight word style. You will find the information here are arrange for enjoyable reading through experience without leaving even decrease the knowledge that want to deliver to you. The writer connected with Elliptic Functions (Grundlehren der mathematischen Wissenschaften) content conveys prospect easily to understand by lots of people. The printed and e-book are not different in the content material but it just different as it. So , do you nonetheless thinking Elliptic Functions (Grundlehren der mathematischen Wissenschaften) is not loveable to be your top listing reading book?

Marsha Young:

This Elliptic Functions (Grundlehren der mathematischen Wissenschaften) tend to be reliable for you who want to be described as a successful person, why. The key reason why of this Elliptic Functions (Grundlehren der mathematischen Wissenschaften) can be among the great books you must have is definitely giving you more than just simple reading food but feed you actually with information that perhaps will shock your earlier knowledge. This book will be handy, you can bring it everywhere and whenever your conditions both in e-book and printed types. Beside that this Elliptic Functions (Grundlehren der mathematischen Wissenschaften) forcing you to have an enormous of experience like rich vocabulary, giving you trial of critical thinking that we know it useful in your day action. So , let's have it appreciate reading.

William Stone:

Is it anyone who having spare time after that spend it whole day through watching television programs or just telling lies on the bed? Do you need something new? This Elliptic Functions (Grundlehren der mathematischen Wissenschaften) can be the respond to, oh how comes? The new book you know. You are and so out of date, spending your time by reading in this fresh era is common not a geek activity. So what

these ebooks have than the others?

Warner Gomez:

As we know that book is very important thing to add our knowledge for everything. By a book we can know everything we really wish for. A book is a pair of written, printed, illustrated as well as blank sheet. Every year was exactly added. This e-book Elliptic Functions (Grundlehren der mathematischen Wissenschaften) was filled about science. Spend your spare time to add your knowledge about your research competence. Some people has different feel when they reading a new book. If you know how big selling point of a book, you can sense enjoy to read a reserve. In the modern era like today, many ways to get book that you wanted.
