Modelling the Mitsubishi A6M Zero (Osprey Modelling) By Brian Criner

The A6M Rei Shiki Sento Ki (meaning Type Zero fighter) was the result of an order by the Imperial Japanese Navy for a low-wing monoplane with superior speed, range, climbing powers, and manoeuvrability. It famously served as a fighter escort during the attack on Pearl Harbor in December 1941, and ended the war as the kamikaze plane of choice. This book provides a detailed guide to modelling this popular aircraft across a variety of scales, and features an A6M2-N Rufe, a kamikaze A6M5c, an A6M2 model 21, and a captured A6M5b of TAIC #7, as well as a gallery and walkaround section.

Editorial Review

Review

“This was a fun fast read for me. It has all the content you would expect written in a light conversational style. If you build the A6M or plan to, this book should be on your research list. If you build WWII Japanese aircraft there is ample information on weathering and painting that this book will definitely help you out.”

?*Scott Lodder, AeroScale*

“Osprey's Modelling series is an expanding and wonderfully beneficial resource for modelers and historians alike. I am thrilled the Zero has its own book, and I look forward to utilizing the many new ideas this book so ably demonstrates. I am certain all modelers of the A6M Reisin in particular, and Imperial Japanese air enthusiasts in general will find this book a great value.” ?*Fred Boucher, Aeroscale*

“My favorite thing (besides humility, a great attitude and a fun writing style): one of the only successfully scale attempts I've seen to date, to duplicate the many wrinkles or waves of stressed sheet metal surfaces... Highly recommended--even to guys like me, who only rarely build models with props.” ?*Ward Shrake, Internet Modeler (April 2008)*

About the Author

Brian Criner became interested in modelling at the age of nine when his grandfather bought him a model of a P-51 and told him he would receive a silver dollar if he built it for him. His interest has remained strong ever since. Brian currently works as a biology teacher in a small high school in southern California. This is his first book for Osprey Publishing.

Users Review

From reader reviews:

Mark Frey:

What do you about book? It is not important along? Or just adding material when you require something to explain what the one you have problem? How about your extra time? Or are you busy individual? If you don't have spare time to complete others business, it is make you feel bored faster. And you have time? What did you do? Everybody has many questions above. The doctor has to answer that question mainly because just their can do this. It said that about book. Book is familiar in each person. Yes, it is proper. Because start from on guardería until university need this specific Modelling the Mitsubishi A6M Zero (Osprey Modelling) to read.

Colleen Greenwood:

As people who live in the particular modest era should be upgrade about what going on or details even knowledge to make these individuals keep up with the era that is always change and move ahead. Some of you maybe may update themselves by studying books. It is a good choice to suit your needs but the problems

coming to an individual is you don't know what type you should start with. This Modelling the Mitsubishi A6M Zero (Osprey Modelling) is our recommendation to help you keep up with the world. Why, as this book serves what you want and need in this era.

Alexander Goodman:

Your reading sixth sense will not betray anyone, why because this Modelling the Mitsubishi A6M Zero (Osprey Modelling) e-book written by well-known writer whose to say well how to make book that can be understand by anyone who read the book. Written throughout good manner for you, dripping every ideas and writing skill only for eliminate your current hunger then you still question Modelling the Mitsubishi A6M Zero (Osprey Modelling) as good book not simply by the cover but also by content. This is one reserve that can break don't assess book by its deal with, so do you still needing an additional sixth sense to pick this!? Oh come on your reading through sixth sense already said so why you have to listening to a different sixth sense.

Shane Dagostino:

Is it you who having spare time in that case spend it whole day through watching television programs or just laying on the bed? Do you need something new? This Modelling the Mitsubishi A6M Zero (Osprey Modelling) can be the answer, oh how comes? A fresh book you know. You are so out of date, spending your free time by reading in this new era is common not a geek activity. So what these publications have than the others?
