The book also includes specific chapters devoted to the role of palliative care in non-malignant diseases and conditions, whilst education and training are highlighted as critical to future best practice.

The fifth edition, available both in print and online, is edited by established leaders in the field. The text provides over 100 chapters written by over 200 international authors, making this a truly comprehensive and global text which no hospital, hospice, palliative care service, or medical library should be without.
