A Photographic Atlas for Anatomy & Physiology By Nora Hebert, Ruth Heisler, Jett Chinn, Karen Krabbenhoft, Olga Malakhova

A Photographic Atlas for Anatomy & Physiology is a new visual lab study tool that helps students learn and identify key anatomical structures. Featuring photos from Practice Anatomy Lab™ 3.0 and other sources, the Atlas includes over 250 cadaver dissection photos, histology photomicrographs, and cat dissection photos plus over 50 photos of anatomical models from leading manufacturers such as 3B Scientific®, SOMSO®, and Denoyer-Geppert Science Company. The Atlas is composed of 13 chapters, organized by body system, and includes a final chapter with cat dissection photos. In each chapter, students will first explore gross anatomy, as seen on cadavers and anatomical models, and then conclude with relevant histological images.

Editorial Review

About the Author

Nora Hebert, Ph.D. teaches undergraduate courses in Anatomy and Physiology at Red Rocks Community College near Denver, Colorado. Although most of her students are undergraduates, primarily interested in the allied health professions, Nora has also taught graduate-level Human Physiology for the College's Physician Assistant Program.

Nora is an active faculty member at Red Rocks, serving on the faculty senate, the honors program committee, and the admissions and executive committees for the Physician Assistant Program. She is also part of the College's Campus Green Initiative.

Among her many academic projects, Nora has consulted in the development of an interactive virtual knee, known as the Explorable Virtual Human, with the Center for Human Simulation at the University of Colorado Health Sciences Center. She has also been involved with the Visible Human Dissector program, advising K-12 teachers and postsecondary instructors on how best to implement the Dissector in their classrooms. Nora has been deeply involved in the development of *Practice Anatomy Lab*, as coauthor of versions 2.0 and 3.0. She is also the author of over 60 A&P Flix animations covering muscle physiology, neurophysiology, and muscle origins, actions, insertions, and innervations.

Nora received a Ph.D. in Endocrinology from the University of California at Berkeley.

Ruth E. Heisler is a senior instructor in the Department of Integrative Physiology at the University of Colorado at Boulder where she teaches and coordinates several courses, including Human Anatomy, Comparative Vertebrate Anatomy, and Forensic Biology. She has been an instructor at the University of Colorado for more than 15 years.

At the University of Colorado, Ruth has worked extensively with the Science Education Initiative to improve both the teaching and understanding of scientific material at the undergraduate level. In addition, she has been involved in academic outreach through workshops with the American Academy of Forensic Sciences and the Biological Sciences Initiative. She has been a consultant on projects with the Center for Human Simulation, working with data generated through the Visible Human Project.

Ruth has been deeply involved in the development of *Practice Anatomy Lab*, as coauthor of versions 2.0 and 3.0. She is also author of a custom laboratory manual developed for a large, cadaver-based human anatomy lab.

Ruth received her B.S. in Biology from the University of Minnesota, and her M.A. in Biology from the University of Colorado.

Jett Chinn is an instructor of Human Anatomy in the Science and Technology Division of Cañada College (Redwood City, CA) and also the Life and Earth Sciences Department at the College of Marin (Kentfield, CA).

Jett has more than 20 years of experience teaching Human Anatomy at institutions including San Francisco State University, California College of Podiatric Medicine, and Touro University College of Osteopathic Medicine. He has also taught first-year dental students at the UC San Francisco School of Medicine.

Jett received a B.A. in general biology from San Francisco State University.

Karen M. Krabbenhoft, Ph.D. is a senior lecturer in the Department of Neuroscience at the University of Wisconsin in Madison. During her 20-year career, Karen's focus has been on teaching students at all levels of their educational process, including undergraduate, physician assistant, and medical students. She has been recognized by the University with several awards, including two Medical Alumni Association Distinguished Teaching Awards for the Basic Sciences (1998, 2007), the Dean's Teaching Award (2000), and the Gender Equity Award (1998). Most recently, Karen was selected by the graduating class to receive the Pre-Clinical Teaching Award in 2011.

Karen earned her Ph.D. in Anatomy from the University of Wisconsin.

Olga Malakhova, M.D. is an assistant scholar in the Department of Anatomy and Cell Biology at the University of Florida College of Medicine in Gainesville. She has been teaching first-, second-, and fourth-year medical students, as well as several Clinical Residency programs, at the University of Florida for the past 20 years.

Olga's teaching excellence has been recognized by several awards, including six Exemplary Teacher awards from the University of Florida. She was also recognized as a Master Educator by the University's Medical Education Faculty Development Program (2006).

Olga received her M.D. from Odessa Medical Institute in Ukraine, and her Ph.D. in Neuroscience from the Brain Research Institute of the Russian Academy of Medical Sciences in Moscow.

Users Review

From reader reviews:

Charles Davis:

Throughout other case, little men and women like to read book A Photographic Atlas for Anatomy & Physiology. You can choose the best book if you like reading a book. Providing we know about how is important the book A Photographic Atlas for Anatomy & Physiology. You can add knowledge and of course you can around the world by way of a book. Absolutely right, since from book you can understand everything! From your country till foreign or abroad you will be known. About simple issue until wonderful thing it is possible to know that. In this era, we are able to open a book or searching by internet unit. It is called e-book. You can utilize it when you feel bored stiff to go to the library. Let's read.

William Lee:

In this 21st one hundred year, people become competitive in each way. By being competitive now, people have do something to make these individuals survives, being in the middle of the actual crowded place and notice by surrounding. One thing that occasionally many people have underestimated it for a while is reading. That's why, by reading a reserve your ability to survive increase then having chance to stand up than other is high. For you who want to start reading some sort of book, we give you that A Photographic Atlas for Anatomy & Physiology book as beginner and daily reading guide. Why, because this book is more than just a book.

Anthony Moss:

Are you kind of busy person, only have 10 as well as 15 minute in your day time to upgrading your mind ability or thinking skill even analytical thinking? Then you are having problem with the book as compared to can satisfy your short period of time to read it because pretty much everything time you only find book that need more time to be learn. A Photographic Atlas for Anatomy & Physiology can be your answer because it can be read by an individual who have those short time problems.

Kermit Moors:

In this era which is the greater particular person or who has ability in doing something more are more valuable than other. Do you want to become one of it? It is just simple strategy to have that. What you have to do is just spending your time not very much but quite enough to enjoy a look at some books. Among the books in the top checklist in your reading list will be A Photographic Atlas for Anatomy & Physiology. This book which is qualified as The Hungry Slopes can get you closer in turning into precious person. By looking upward and review this reserve you can get many advantages.
