Children's Speech: An Evidence-Based Approach to Assessment and Intervention (What's New in Communication Sciences & Disorders) By Sharynne McLeod, Elise Baker

Children's Speech distills scientific evidence from around the world on sound disorders across the areas of speech acquisition, assessment, analysis, diagnosis, and intervention, and presents it with practical knowledge to prepare speech-language pathologists (SLPs) to work with children and their families. The book is guided by two contemporary frameworks that direct the successful management of speech sound disorders in children: evidence-based practice (EBP) and the International Classification of Functioning Disability and Health—Children and Youth (ICF-CY). The foundation knowledge covers important topics including defining the population, types of speech sound disorders, anatomical structures, articulation and transcription of speech sounds, and theoretical foundations of speech and speech acquisition. Practical evidence-based knowledge is covered in chapters that mirror the stages of contact when working with children with speech sound disorders including assessment, analysis, goal setting, intervention principles and plans, intervention procedures, phonological interventions, motor speech interventions, and the conduct of EBP. The last chapter provides comprehensive clinical information for five clinical cases, including transcribed speech samples, case history information, assessment results and other real-life material. Throughout, readers are directed to complete clinical application tasks, drawing on the case-based information in this final chapter.

Editorial Review

Review

Children's Speech is not only a comprehensive and authoritative presentation of children's speech sound disorders (SSDs), written to and for evidence-based (student) clinicians, it is a well-designed course on the topic, complete with PowerPoint lecture notes and in-class activity suggestions, as well as challenging examination questions for each of the book's 16 chapters. It is packed with useful features, such as first-rate photographs and electro-palatograms of typical and atypical oral structures and their positions during speech, as well as repeated references throughout the book to five children with different types of SSD. Despite the density and depth of information it provides, the book is so clearly written, students and clinicians will want to keep it handy on their shelves for reference long after they complete their first reading.

- Dr. Marc Fey, University of Kansas Medical Center

From the Back Cover

Children's Speech distills scientific evidence from around the world on sound disorders across the areas of speech acquisition, assessment, analysis, diagnosis, and intervention, and presents it with practical knowledge to prepare speech-language pathologists (SLPs) to work with children and their families. The book is guided by two contemporary frameworks that direct the successful management of speech sound disorders in children: evidence-based practice (EBP) and the International Classification of Functioning Disability and Health—Children and Youth (ICF-CY). The foundation knowledge covers important topics including defining the population, types of speech sound disorders, anatomical structures, articulation and transcription of speech sounds, and theoretical foundations of speech and speech acquisition. Practical evidence-based knowledge is covered in chapters that mirror the stages of contact when working with children with speech sound disorders including assessment, analysis, goal setting, intervention principles and plans, intervention procedures, phonological interventions, motor speech interventions, and the conduct of EBP. The last chapter provides comprehensive clinical information for five clinical cases, including transcribed speech samples, case history information, assessment results and other real-life material. Throughout, readers are directed to complete clinical application tasks, drawing on the case-based information in this final chapter.

This First Edition:

- Distills the world's research on speech sound disorders across the areas of speech acquisition, assessment, analysis, diagnosis, and intervention.
- International in scope.
- Facilitates student learning with a number of valuable pedagogical aids.
- Supports course teaching with a number of aids for instructors.

About the Author

Sharynne McLeod, Ph.D. is a speech-language pathologist and professor of speech and language

acquisition from Charles Sturt University, Australia. She is an elected Fellow of the American Speech-Language-Hearing Association and Life Member of Speech Pathology Australia. She is an elected board member of the International Association of Logopedics and Phoniatrics, Vice President of the International Clinical Linguistics and Phonetics Association, a past editor of the International Journal of Speech-Language Pathology and co-chair of the International Expert Panel on Multilingual Children's Speech. Dr. McLeod has been an invited speaker at the American Speech-Language-Hearing Association conventions as well as at conferences and universities in Australia, Hong Kong, Iceland, Italy, Ireland, New Zealand, Norway, Sweden, Turkey, UK, US, and Vietnam.

Dr. McLeod's research focuses on monolingual and multilingual children's speech. She applies the International Classification of Functioning, Disability and Health (ICF-CY, World Health Organization, 2007) to children with speech sound disorders and is one of two speech-language pathologists who contributed to the development of the ICF-CY (WHO, 2007). Her research foregrounds the right of everyone (particularly children) to participate fully in society. Dr. McLeod also researches the prevalence and impact of childhood speech sound disorders and links this to policy and service delivery issues.

Elise Baker, PhD is a speech-language pathologist and academic from The University of Sydney, Australia. Dr. Baker has been an invited speaker at American Speech-Language-Hearing Association conventions has served as the National Tour Speaker for Speech Pathology Australia and is a member of the International Expert Panel on Multilingual Children's Speech. Dr. Baker is an award-winning teacher. She has taught tertiary students in the area of speech sound disorders in children for over 20 years. She is passionate about speech-language pathologists and researchers working together to foster knowledge creation, dissemination and implementation. Dr. Baker nurtures her passion through service on the steering committee of a large evidence-based practice network of practicing speech-language pathologists. Dr. Baker's research focuses on intervention for speech sound disorders in children, innovative service delivery solutions for children with speech sound disorders, speech-language pathologists' methods of practice with children who have speech sound disorders, and the conduct of evidence-based practice.

Users Review

From reader reviews:

Cornell Warren:

Reading a book can be one of a lot of exercise that everyone in the world likes. Do you like reading book consequently. There are a lot of reasons why people like it. First reading a publication will give you a lot of new facts. When you read a book you will get new information due to the fact book is one of various ways to share the information or even their idea. Second, reading a book will make you actually more imaginative. When you reading through a book especially hype book the author will bring you to definitely imagine the story how the character types do it anything. Third, you may share your knowledge to others. When you read this Children's Speech: An Evidence-Based Approach to Assessment and Intervention (What's New in Communication Sciences & Disorders), it is possible to tells your family, friends along with soon about yours e-book. Your knowledge can inspire the mediocre, make them reading a guide.

Cheryl Reese:

Reading a publication tends to be new life style within this era globalization. With reading you can get a lot

of information that may give you benefit in your life. With book everyone in this world may share their idea. Textbooks can also inspire a lot of people. Lots of author can inspire their particular reader with their story as well as their experience. Not only the storyline that share in the books. But also they write about the knowledge about something that you need example. How to get the good score toefl, or how to teach your sons or daughters, there are many kinds of book which exist now. The authors these days always try to improve their skill in writing, they also doing some research before they write to their book. One of them is this Children's Speech: An Evidence-Based Approach to Assessment and Intervention (What's New in Communication Sciences & Disorders).

Olive Griffin:

Spent a free time to be fun activity to accomplish! A lot of people spent their sparetime with their family, or all their friends. Usually they accomplishing activity like watching television, going to beach, or picnic within the park. They actually doing same every week. Do you feel it? Do you need to something different to fill your own free time/ holiday? Could be reading a book can be option to fill your cost-free time/ holiday. The first thing that you will ask may be what kinds of guide that you should read. If you want to test look for book, may be the guide untitled Children's Speech: An Evidence-Based Approach to Assessment and Intervention (What's New in Communication Sciences & Disorders) can be fine book to read. May be it may be best activity to you.

Lynda Alford:

This Children's Speech: An Evidence-Based Approach to Assessment and Intervention (What's New in Communication Sciences & Disorders) is great guide for you because the content that is certainly full of information for you who all always deal with world and still have to make decision every minute. This particular book reveal it details accurately using great coordinate word or we can point out no rambling sentences included. So if you are read that hurriedly you can have whole details in it. Doesn't mean it only provides you with straight forward sentences but hard core information with splendid delivering sentences. Having Children's Speech: An Evidence-Based Approach to Assessment and Intervention (What's New in Communication Sciences & Disorders) in your hand like keeping the world in your arm, facts in it is not ridiculous one particular. We can say that no guide that offer you world within ten or fifteen second right but this reserve already do that. So , this is certainly good reading book. Heya Mr. and Mrs. stressful do you still doubt in which?
