Industrial Ventilation Design Guidebook By Howard D. Goodfellow

The **Industrial Ventilation Design Guidebook** addresses the design of air technology systems for the control of contaminants in industrial workplaces such as factories and manufacturing plants. It covers the basic theories and science behind the technical solutions for industrial air technology and includes publication of new fundamental research and design equations contributed by more than 40 engineers and scientists from over 18 countries.

Readers are presented with scientific research and data for improving the indoor air quality in the workplace and reducing emissions to the outside environment.

The **Guidebook** represents, for the first time, a single source of all current scientific information available on the subject of industrial ventilation and the more general area of industrial air technology. New Russian data is included that fills several gaps in the scientific literature.

- * Presents technology for energy optimization and environmental benefits
- * A collaborated effort from more than 60 ventilation experts throughout 18 countries
- * Based on more than 50 million dollars of research and development focused on industrial ventilation
- * Includes significant scientific contributions from leading ventilation experts in Russia
- * Presents new innovations including a rigorous design methodology and target levels
- * Contains extensive sections on design with modeling techniques
- * Content is well organized and easily adaptable to computer applications

Industrial Ventilation Design Guidebook By Howard D. Goodfellow **Bibliography**

- Sales Rank: #2649955 in Books
- Published on: 2001-05-01
- Original language: English
- Number of items: 1
- Dimensions: 2.40" h x 7.30" w x 10.00" l, 6.15 pounds
- Binding: Hardcover
- 1519 pages

Editorial Review

Review

"The book is an excellent reference source and handbook of fundamentals related to industrial air technology. I would highly recommend it for anyone who designs or troubleshoots ventilation systems used for comfort or contaminant control or who evaluates the work environment and provides recommendations for control."

--Chemical Health & Safety, Jan/Feb 2002

From the Back Cover

The Industrial Ventilation Design Guidebook represents for the first time, a single source of all current scientific information available on the subject of industrial ventilation and the more general area of industrial air technology. Covering the basic theories and science behind the technical solutions for industrial air technology, it is the first international handbook and includes publication of new fundamental research and design equations.

The Guidebook addresses the design of air technology systems for the control of contaminants in industrial workplaces such as factories and manufacturing plants. It addresses the scientific approach to improving air quality inside the plant and to reducing emissions to the outside environment. With the extensive and up-to-date material provided, the aim is to be able to design environmentally and energy efficient industrial operations.

Key Features

- Presents technology for energy optimization and environmental benefits
- A collaborated effort from more than 60 ventilation experts throughout 18 countries
- Based on more than 50 million dollars of research and development focused on industrial ventilation
- Includes significant scientific contributions from leading ventilation experts in Russia
- Presents new innovations including a rigorous design methodology and target levels
- Contains extensive sections on design with modeling techniques
- Content is well organized and easily adaptable to computer applications

About the Author

Howard D. Goodfellow is VP of Stantec Global Technologies Ltd. Stantec is a Canadian professional services firm providing knowledge-based solutions for infrastructure and facilities. Stantec sells and markets Goodfellow EFSOPZ (Expert Furnace System Optimization Process), an award-winning software and hardware technology system. Goodfellow EFSOPZ uses online off-gas chemistry measurements from industrial combustion processes for closed-loop control for process optimization. Goodfellow is a recognized expert in the ventilation, air pollution control, and air quality areas.

He graduated with a Ph.D. from the Department of Chemical Engineering and Applied Chemistry at the University of Toronto and has been responsible for specialized consulting and engineering design services for over 1000 industrial and government clients in the environmental field. He is an Adjunct Associate Professor in the Department of Chemical Engineering and Applied Chemistry at the University of Toronto, where he teaches a graduate course in ventilation and conducts research and development in the ventilation and indoor air quality field. Dr. Goodfellow was awarded the 2T5 Meritorious Service Medal of the Engineering Alumni Association of the University of Toronto. The award was for his outstanding contributions as an engineer, teacher, researcher, author, and administrator in the field of ventilation and

occupational health at the University of Toronto, with global recognition for achievements in the advancement of environmental consulting. Professor Goodfellow also teaches a Mine Ventilation and Occupational Health course at the University of Toronto in the Lassonde Mineral Engineering Programme. Dr. Goodfellow has presented numerous courses internationally in the clean air technology field, both for industrial clients and at conferences and seminars, and he has presented and/or published over 100 technical papers.

Dr. Goodfellow has worked with TEKES and the INVENT team in Finland since 1993. He spent three months (April-June 1997) lecturing at the Helsinki University of Technology, initiating research projects in the ventilation field, and working with Finnish experts in the planning stages of the Design Guidebook.

Users Review

From reader reviews:

Jamie Lundquist:

Here thing why this kind of Industrial Ventilation Design Guidebook are different and dependable to be yours. First of all reading through a book is good nevertheless it depends in the content of the usb ports which is the content is as delightful as food or not. Industrial Ventilation Design Guidebook giving you information deeper as different ways, you can find any book out there but there is no book that similar with Industrial Ventilation Design Guidebook. It gives you thrill reading journey, its open up your eyes about the thing that happened in the world which is probably can be happened around you. You can bring everywhere like in park your car, café, or even in your means home by train. In case you are having difficulties in bringing the imprinted book maybe the form of Industrial Ventilation Design Guidebook in e-book can be your option.

Ray Ellis:

Reading a book tends to be new life style in this particular era globalization. With examining you can get a lot of information that can give you benefit in your life. With book everyone in this world can share their idea. Publications can also inspire a lot of people. Plenty of author can inspire all their reader with their story as well as their experience. Not only the storyplot that share in the books. But also they write about the knowledge about something that you need case in point. How to get the good score toefl, or how to teach children, there are many kinds of book that you can get now. The authors these days always try to improve their ability in writing, they also doing some study before they write for their book. One of them is this Industrial Ventilation Design Guidebook.

Kenneth Flowers:

Are you kind of busy person, only have 10 or perhaps 15 minute in your moment to upgrading your mind skill or thinking skill perhaps analytical thinking? Then you are having problem with the book as compared to can satisfy your limited time to read it because all of this time you only find guide that need more time to be examine. Industrial Ventilation Design Guidebook can be your answer as it can be read by you actually who have those short spare time problems.

April Cotton:

Guide is one of source of knowledge. We can add our know-how from it. Not only for students but also native or citizen require book to know the upgrade information of year to help year. As we know those ebooks have many advantages. Beside most of us add our knowledge, can bring us to around the world. By book Industrial Ventilation Design Guidebook we can acquire more advantage. Don't one to be creative people? For being creative person must prefer to read a book. Merely choose the best book that suited with your aim. Don't end up being doubt to change your life at this time book Industrial Ventilation Design Guidebook. You can more inviting than now.
