Integrating Agriculture, Conservation and Ecotourism: Examples from the Field (Issues in Agroecology – Present Status and Future Prospectus) From Springer

Issues In Agroecology – Present Status and Future Prospectus not only reviews aspects of ecology, but the ecology of sustainable food production systems, and related societal and cultural values. To provide effective communication regarding status and advances in this field, this series connects with many disciplines such as sociology, anthropology, environmental sciences, ethics, agriculture, economics, ecology, rural development, sustainability, policy and education, and integrations of these general themes so as to provide integrated points of view that will help lead to a more sustainable construction of values than conventional economics alone. Such designs are inherently complex and dynamic, and go beyond the individual farm to include landscapes, communities, and biogeographic regions by emphasizing their unique agricultural and ecological values, and their biological, societal, and cultural components and processes.

Editorial Review

Review

From the reviews:

“This book explores the new frontier of agroecology, the fluid intersection of environment and agriculture. It is the first of an interdisciplinary multivolume series that covers the future of agriculture, the related fields of ecotourism and conservation, sustainability and environmental issues, and more. ... Summing Up: Recommended. Upper-division undergraduates through professionals/practitioners.” (M. J. Stone, *Choice*, Vol. 49 (8), April, 2012)

From the Back Cover

Issues In Agroecology integrates agriculture, ecology, sociology, anthropology, environmental sciences, ethics, economics, rural development, sustainability, policy and education. The series approaches this complex panorama of topics by presenting authoritative, comprehensive, and analytical reviews from leading scientists in all areas of agroecology worldwide. Authors are invited and represent a collaborative mix to provide strong summaries and scholarly advances that serve as foundations for discussion leading to novel routes of research activity, application of management methodologies, and education and outreach programs. Each review is a concise and up-to-date synthesis of the rapidly growing quantity of scientific information within this highly interdisciplinary field. The authors for each review assess the present status of the knowledge as to whether or not it is effectively contributing to increased sustainability. As a part of this assessment, the authors identify inadequacies, errors, and gaps in knowledge that may be hindering or opposing sustainability objectives. For each review, the authors ultimately discuss what might be needed to bring work and programs onto a better track towards achieving sustainability. Such informed assessments of the routes to realize future potential go beyond the individual farm to include landscapes, communities, and biogeographic regions by emphasizing their unique agricultural and ecological values, and their biological, societal, and cultural components and processes. As a result of these efforts, this series is an essential part of the scientific method and a necessity for researchers, teachers, students, and field professionals when dealing with increasing global environmental and socioeconomic change. Issues In Agroecology is a highly citable series that is guaranteed to enlighten research teams, technology users, educators, students, and the general public on the status and advances of agroecology worldwide.

About the Author

Issues In Agroecology integrates agriculture, ecology, sociology, anthropology, environmental sciences, ethics, economics, rural development, sustainability, policy and education. The series approaches this complex panorama of topics by presenting authoritative, comprehensive, and analytical reviews from leading scientists in all areas of agroecology worldwide. Authors are invited and represent a collaborative mix to provide strong summaries and scholarly advances that serve as foundations for discussion leading to novel routes of research activity, application of management methodologies, and education and outreach programs. Each review is a concise and up-to-date synthesis of the rapidly growing quantity of scientific information within this highly interdisciplinary field. The authors for each review assess the present status of the knowledge as to whether or not it is effectively contributing to increased sustainability. As a part of this assessment, the authors identify inadequacies, errors, and gaps in knowledge that may be hindering or

opposing sustainability objectives. For each review, the authors ultimately discuss what might be needed to bring work and programs onto a better track towards achieving sustainability. Such informed assessments of the routes to realize future potential go beyond the individual farm to include landscapes, communities, and biogeographic regions by emphasizing their unique agricultural and ecological values, and their biological, societal, and cultural components and processes. Users Review

From reader reviews:

Kurt Rose:

Book is to be different for each grade. Book for children until eventually adult are different content. To be sure that book is very important usually. The book *Integrating Agriculture, Conservation and Ecotourism: Examples from the Field (Issues in Agroecology – Present Status and Future Prospectus)* has been making you to know about other understanding and of course you can take more information. It is very advantages for you. The guide *Integrating Agriculture, Conservation and Ecotourism: Examples from the Field (Issues in Agroecology – Present Status and Future Prospectus)* is not only giving you far more new information but also for being your friend when you experience bored. You can spend your own personal spend time to read your guide. Try to make relationship with the book *Integrating Agriculture, Conservation and Ecotourism: Examples from the Field (Issues in Agroecology – Present Status and Future Prospectus)*. You never truly feel lose out for everything when you read some books.

Gary Lopez:

The knowledge that you get from *Integrating Agriculture, Conservation and Ecotourism: Examples from the Field (Issues in Agroecology – Present Status and Future Prospectus)* will be the more deep you searching the information that hide inside words the more you get interested in reading it. It doesn't mean that this book is hard to be aware of but *Integrating Agriculture, Conservation and Ecotourism: Examples from the Field (Issues in Agroecology – Present Status and Future Prospectus)* giving you excitement feeling of reading. The article writer conveys their point in selected way that can be understood through anyone who read this because the author of this book is well-known enough. This book also makes your own personal vocabulary increase well. So it is easy to understand then can go with you, both in printed or e-book style are available. We recommend you for having this specific *Integrating Agriculture, Conservation and Ecotourism: Examples from the Field (Issues in Agroecology – Present Status and Future Prospectus)* instantly.

Karl Wolfe:

Integrating Agriculture, Conservation and Ecotourism: Examples from the Field (Issues in Agroecology – Present Status and Future Prospectus) can be one of your beginner books that are good idea. Many of us recommend that straight away because this reserve has good vocabulary that can increase your knowledge in vocabulary, easy to understand, bit entertaining but nonetheless delivering the information. The article writer giving his/her effort to put every word into delight arrangement in writing *Integrating Agriculture,*

Conservation and Ecotourism: Examples from the Field (Issues in Agroecology – Present Status and Future Prospectus) yet doesn't forget the main point, giving the reader the hottest along with based confirm resource details that maybe you can be certainly one of it. This great information may drawn you into completely new stage of crucial imagining.

Doris Avey:

Guide is one of source of expertise. We can add our knowledge from it. Not only for students and also native or citizen need book to know the update information of year to be able to year. As we know those publications have many advantages. Beside most of us add our knowledge, also can bring us to around the world. Through the book Integrating Agriculture, Conservation and Ecotourism: Examples from the Field (Issues in Agroecology – Present Status and Future Prospectus) we can acquire more advantage. Don't that you be creative people? To become creative person must want to read a book. Merely choose the best book that appropriate with your aim. Don't become doubt to change your life with that book Integrating Agriculture, Conservation and Ecotourism: Examples from the Field (Issues in Agroecology – Present Status and Future Prospectus). You can more desirable than now.
