It's Our Research: Getting Stakeholder Buy-in for User Experience Research Projects By Tomer Sharon

It's Our Research: Getting Stakeholder Buy-in for User Experience Research Projects discusses frameworks, strategies, and techniques for working with stakeholders of user experience (UX) research in a way that ensures their buy-in.

This book consists of six chapters arranged according to the different stages of research projects. Topics discussed include the different roles of business, engineering, and user-experience stakeholders; identification of research opportunities by developing empathy with stakeholders; and planning UX research with stakeholders. The book also offers ways of teaming up with stakeholders; strategies to improve the communication of research results to stakeholders; and the nine signs that indicate that research is making an impact on stakeholders, teams, and organizations.

This book is meant for UX people engaged in usability and UX research. Written from the perspective of an in-house UX researcher, it is also relevant for self-employed practitioners and consultants who work in agencies. It is especially directed at UX teams that face no-time-no-money-for-research situations.

- Named a 2012 Notable Computer Book for Information Systems by *Computing Reviews*
- Features a series of video interviews with UX practitioners and researchers
- Provides dozens of case studies and visuals from international research practitioners
- Provides a toolset that will help you justify your work to stakeholders, deal with office politics, and hone your client skills
- Presents tried and tested techniques for working to reach positive, useful, and fruitful outcomes

Editorial Review

Review

"I find the book compelling because it's international, based on experience, business oriented, and practical, and it has videos....The book is definitely international, with mini-essays by usability practitioners from all over the world (the videos are international as well). This produces a wide variety of contexts and highlights some interesting parallels."--**Computing Reviews.com**, December 5, 2012 "In this book, Tomer Sharon does a great and ground-breaking job of presenting useful wisdom on how to make usability research useful and usable, and how to sell it. The contents of this book can be summarized in seven words: Do as you preach and be humble. If that's not sufficiently usable for you, read this book!"? **Rolf Molich**, DialogDesign "Tomer Sharon's book is the cure for usability professionals whose work isn't having the impact it deserves. Here you'll find ways to work different, to make your research connect with stakeholders instead of trash cans. File under: work smarter, not harder." -**Gerard Torenvliet**, Senior Human Factors Scientist, Medtronic "A thoroughly readable look at how to make sure our user research actually makes it into the products we create. It explains how to get everyone engaged, how to plan research that asks the right questions, and how to help people use research findings. It's full of practical tips, great advice and real-life stories from practitioners."? **Donna Spencer**, Maadmob "It's Our Research" should be required reading for anyone involved in a UX research study. Sharon will not only help you avoid the many pitfalls that most UX research projects come across, but more importantly give you all the tips and tricks for getting the most out of your UX research."--**William Albert**, Bentley University; Author, *Measuring the User Experience and Beyond the Usability Lab* "There is probably no question that I am asked more often than "How can I have more influence?" User research that isn't able to bring insight and drive improvement might as well not have happened. This book is the most complete guide to getting stakeholder buy-in that I have seen. It is a "must read" for researchers and their managers."? **Arnie Lund**, Microsoft; Author, *User Experience Management* "As an experienced Human Factors Engineer, I thought I knew how to do user research and engage stakeholders. But in these pages I discovered new ways to ensure my user research will be useful to my clients. The book is well organized and includes rich interviews and case study content. I especially appreciated the takeaways at the end of each chapter."-- **Stan Caplan**, President, Usability Associates, LLC "The best researchers know how to inspire their stakeholders to act on their findings. At Google, Tomer brings a unique combination of depth and inventiveness in the way he communicates and works with the designers and managers who need to act on his findings. This learned, direct and humorous book explains how he achieves that."--**Giles Colborne**, cpartners, Author, *Simple and usable web, mobile and interaction design* "If no one reads your report or implements your recommendations does it really matter how statistically valid your findings were? Do your yourself and your users a favor ...read Tomer's Book."--**Jeff Sauro**, Principal Measuring Usability LLC; Author, *Quantifying the User Experience* "This guide explains how to increase the chances that stakeholders (such as product managers, engineers, and management) will actually act on the user experience (UX) research they have commissioned. The guide is written from the perspective of in-house UX researchers (especially 'teams of one'), but it is also relevant for self-employed practitioners and consultants. It will also be useful for design researchers, product designers, user interface designers, information architects, and human factors specialists. The book primarily discusses UX research on digital services, but also covers digital products and systems of products and services in industrial and medical settings. Advice is given on dealing with difficult people, combining quantitative and qualitative data, and communicating research results. The book's appealing layout includes color photos, illustrations, diagrams, screenshots, and charts. Web sites and video interviews can be accessed using quick response (QR) codes supplied in the book."--**Reference and Research Book News, Inc.**

About the Author

Tomer Sharon is a User Experience researcher at Google Search. Previously, he led the user experience research effort for Google's online advertising management platform - DFP (DoubleClick for Publishers). Prior to Google, he worked at Check Point Software Technologies in Israel as User Experience Researcher Lead.

As founder and first president of UPA Israel, he led the chapter to many achievements such as raising awareness of the need for easy-to-use, efficient, and fun technology products, and growing and nurturing a professional community of 1,000 practitioners.

Tomer is an experienced speaker at local and international conferences, a published author of articles and papers, and a past editorial board member for UPA's UX Magazine. Tomer holds a BA in Social Sciences from The Open University and a master's degree in Human Factors in Information Design from Bentley University in Waltham, MA.

Users Review

From reader reviews:

Louis Vasquez:

Do you have favorite book? For those who have, what is your favorite's book? Book is very important thing for us to learn everything in the world. Each publication has different aim or goal; it means that publication has different type. Some people feel enjoy to spend their the perfect time to read a book. They are reading whatever they take because their hobby is reading a book. How about the person who don't like examining a book? Sometime, man feel need book if they found difficult problem or exercise. Well, probably you should have this It's Our Research: Getting Stakeholder Buy-in for User Experience Research Projects.

Tara Wilson:

Reading a reserve tends to be new life style with this era globalization. With looking at you can get a lot of information which will give you benefit in your life. Together with book everyone in this world can certainly share their idea. Books can also inspire a lot of people. Many author can inspire their reader with their story or their experience. Not only the story that share in the guides. But also they write about advantage about something that you need illustration.
