**Unlock the advanced features and full power of VMware Horizon 6 to deliver the industry's most comprehensive end-to-end user experience**

## About This Book

- Learn why a EUC strategy is important, what it can deliver, and the approach you should take when starting out with your own project
- Understand the key architecture components, new capabilities, and how to build, install, and configure an optimized delivery platform for end-user computing services
- Build your own environment for VDI and hosted applications with the help of screenshots, real-life scenarios, and best practices

## Who This Book Is For

If you are working as a desktop admin, part of a EUC team, an architect, or a consultant on a desktop virtualization project and you are looking to use VMware's Horizon solution, this book is for you. This book will demonstrate the new capabilities of Horizon 6. You should have experience in desktop management using Windows and Microsoft Office, and be familiar with Active Directory, SQL, Windows Remote Desktop Session Hosting, and VMware vSphere infrastructure (ESXi and vCenter Server) technology.

## What You Will Learn

- Install and configure the VMware Horizon 6 Version 6.1 solution, including new features such as vGPU
- Manage user profiles in a virtual desktop environment with View Persona Management
- Configure Horizon View to deliver hosted applications and desktops
- Build, optimize, and tune desktop operating systems to deliver a superior end-user experience
- Perform an upgrade from a previous versions of Horizon View to Horizon View 6.1

- Explore Horizon Advanced Edition, including Workspace Portal, VMware Mirage, and Horizon FLEX
- Introduction to App Volumes including step-by-step configuration and deployment
- Delve deeper into the Horizon 6 version 6.1 infrastructure to understand how the solution components work and fit together along with a methodology for approaching an EUC project
- Configure, manage, and deploy desktop pools for individual use cases

## In Detail

Horizon 6 is VMware's latest end-user computing solution, designed not only to centralize and virtualize desktop environments but also to deliver individual applications securely to any device by means of a virtual workspace.

Your journey starts by investigating an end-user computing project including assessment, pilot, and production. Next, we move into the design phase where we will first take a deeper look at the Horizon 6 solution and its components and how to plan their use in a successful project. Once we have our design and have identified our use cases, we will start to install and configure the core solution. With that in place, we will fine-tune the best end-user experience. Finally, we examine the advanced and enterprise features of Horizon 6, such as VSAN, vCOPS for View, and Horizon Mirage.

## **Editorial Review**

About the Author

### **Peter von Oven**

Peter von Oven is an experienced technical consultant and has spent the last 20 years of his IT career working with customers and partners, designing technology solutions aimed at delivering true business value. During his career, Peter was involved in numerous large-scale enterprise projects and deployments. He has presented at key IT events and has worked in senior presales roles for some of the giants of IT. Over the last 9 years, Peter has used his skills and experience within the desktop virtualization market. Today, he is a subject matter expert in end user computing at VMware in the UK, and is also the systems engineering manager for the partner and general business SE team. Peter got his first taste of writing when assisting with some of the chapters in the book *Building End-User Computing Solutions with VMware View*. This led him to author three Packt Publishing titles: *VMware Horizon Mirage Essentials*, *VMware Horizon View Essentials*, and *VMware Horizon Workspace Essentials*, coauthored by Peter Bjork and Joel Lindberg.

### **Barry Coombs**

Barry Coombs is the presales director for Computerworld Systems, a UK-based, virtualization-focused value-added reseller. He has been focusing on virtualization, storage, and end-user computing technologies as a customer, consultant, and architect for the last 8 years. Previously, Barry was a member of a team supporting internal and customer solutions and projects for a software house. This role brought with it a variety of experiences, particularly with Microsoft, Citrix, and VMware technologies. In his current role, Barry manages a team of technical architects and is actively involved in engaging with customers and designing solutions to meet their needs. He also works with his technical director to set implementation standards and act as a point of technical escalation. Barry is responsible for identifying new technologies and speaking at and hosting customer-focused events surrounding virtualization, storage, and end-user computing. Barry has been awarded VMware's vExpert award for contributions to the VMware community every year since 2010. He is also part of the VMUG leadership team for South West UK and has a VMware-focused blog, <http://virtualisedreality.com/>. He is active on Twitter (@virtualisedreal), particularly reporting live from many industry-related events. This is Barry's second book on end-user computing technologies. He was a coauthor of *Building End-User Computing Solutions with VMware View* published in 2012.
