Mathematical Techniques in Multisensor Data Fusion (Artech House Information Warfare Library) By David L. Hall, Sonya A. H. McMullen

Since the publication of the first edition of this groundbreaking book, advances in algorithms, logic, and software tools have transformed the field of data fusion. The latest edition covers these areas as well as smart agents, human computer interaction, cognitive aides to analysis, and data system fusion control.

Besides aiding you in selecting the appropriate algorithm for implementing a data fusion system, this book guides you through the process of determining the trade-offs among competing data fusion algorithms, selecting commercial off the shelf (COTS) tools, and understanding when data fusion improves systems processing. Completely new chapters in this second edition explain data fusion system control, DARPA's recently developed TRIP model, and the latest applications of data fusion in data warehousing and medical equipment, as well as defense systems.

Editorial Review

About the Author

David L. Hall is the associate dean for research at The Pennsylvania State University, School of Information Sciences and Technology. He is also the author of Lectures in Multisensor Data Fusion and Target Tracking (Artech House, 2001). He earned his Ph.D. in Astronomy at The Pennsylvania State University. He is an IEEE Fellow. Sonya A. H. McMullen is a Captain with the US Air Force. She earned an M.S. in aerospace engineering at Embry-Riddle Aeronautic University.

Users Review

From reader reviews:

Jack Crawford:

The feeling that you get from Mathematical Techniques in Multisensor Data Fusion (Artech House Information Warfare Library) may be the more deep you looking the information that hide within the words the more you get thinking about reading it. It doesn't mean that this book is hard to comprehend but Mathematical Techniques in Multisensor Data Fusion (Artech House Information Warfare Library) giving you joy feeling of reading. The article author conveys their point in a number of way that can be understood through anyone who read the item because the author of this publication is well-known enough. That book also makes your own personal vocabulary increase well. It is therefore easy to understand then can go with you, both in printed or e-book style are available. We advise you for having this kind of Mathematical Techniques in Multisensor Data Fusion (Artech House Information Warfare Library) instantly.

Stephanie Carlton:

Playing with family in a very park, coming to see the marine world or hanging out with close friends is thing that usually you will have done when you have spare time, after that why you don't try matter that really opposite from that. 1 activity that make you not experience tired but still relaxing, trilling like on roller coaster you have been ride on and with addition of knowledge. Even you love Mathematical Techniques in Multisensor Data Fusion (Artech House Information Warfare Library), you can enjoy both. It is fine combination right, you still want to miss it? What kind of hang type is it? Oh can occur its mind hangout people. What? Still don't buy it, oh come on its identified as reading friends.

Pamela Garcia:

Do you really one of the book lovers? If yes, do you ever feeling doubt when you find yourself in the book store? Aim to pick one book that you just dont know the inside because don't judge book by its include may doesn't work the following is difficult job because you are scared that the inside maybe not while fantastic as in the outside seem likes. Maybe you answer can be Mathematical Techniques in Multisensor Data Fusion (Artech House Information Warfare Library) why because the wonderful cover that make you consider about the content will not disappoint you actually. The inside or content is actually fantastic as the outside or

perhaps cover. Your reading 6th sense will directly show you to pick up this book.

Michael Sherman:

What is your hobby? Have you heard in which question when you got college students? We believe that that issue was given by teacher to the students. Many kinds of hobby, Every person has different hobby. So you know that little person like reading or as looking at become their hobby. You should know that reading is very important and book as to be the point. Book is important thing to add you knowledge, except your personal teacher or lecturer. You see good news or update with regards to something by book. A substantial number of sorts of books that can you choose to use be your object. One of them is niagra Mathematical Techniques in Multisensor Data Fusion (Artech House Information Warfare Library).
