### Matrices and Tensors in Physics By A.W. Joshi

In good condition with dust jacket. Owner's name and date inside front cover. No markings otherwise. This updated edition contains a good deal of new and relevant material including Bessel inequality, vector spaces of functions, physical laws and invariance principle, invariance in 3-D Newtonian and 4-D Minkowski spaces, fully antisymmetric tensors and their contraction. Discusses normal matrices and features a proof of the general theorem that a matrix possesses a complete set of orthonormal eigenvectors if and only if it is a normal matrix. Over 200 exercises and 100+ solved problems help students grasp the concepts presented.

## **Editorial Review**

### About the Author

A.W. Joshi is a professor of physics at the University of Poona. He received his Ph.D from the same university in 1967, for which he worked at the National Chemical Laboratory in Pune. He then worked at the Tata Institute of Fundamental Research, Mumbai, H H Wills Physics Laboratory, University of Bristol, UK, Meerut University, Himachal Pradesh University, Shimla and moved to University of Poona in 1984. He has published about 100 popular, semipopular, research, educational and social articles in newspapers, magazines and journals, including popular science articles in Indian languages. He has written two other books and edited one.

## **Users Review**

### **From reader reviews:**

#### **Debbie Bennett:**

In this 21st centuries, people become competitive in every single way. By being competitive today, people have do something to make all of them survives, being in the middle of the actual crowded place and notice simply by surrounding. One thing that occasionally many people have underestimated that for a while is reading. Yeah, by reading a e-book your ability to survive enhance then having chance to stand up than other is high. For you who want to start reading a book, we give you this Matrices and Tensors in Physics book as starter and daily reading guide. Why, because this book is more than just a book.

#### **Robert Hawkins:**

As people who live in typically the modest era should be up-date about what going on or details even knowledge to make these individuals keep up with the era that is certainly always change and make progress. Some of you maybe will certainly update themselves by reading books. It is a good choice for you but the problems coming to you is you don't know what kind you should start with. This Matrices and Tensors in Physics is our recommendation so you keep up with the world. Why, because this book serves what you want and wish in this era.

#### **Billie Gould:**

The particular book Matrices and Tensors in Physics has a lot details on it. So when you make sure to read this book you can get a lot of profit. The book was published by the very famous author. The writer makes some research previous to write this book. That book very easy to read you can obtain the point easily after perusing this book.

**Linda Cooper:**

That guide can make you to feel relax. That book Matrices and Tensors in Physics was multi-colored and of course has pictures around. As we know that book Matrices and Tensors in Physics has many kinds or style. Start from kids until youngsters. For example Naruto or Private investigator Conan you can read and believe that you are the character on there. Therefore not at all of book usually are make you bored, any it can make you feel happy, fun and relax. Try to choose the best book to suit your needs and try to like reading that will.
