Churchill's Pocketbook of Differential Diagnosis, 4e (Churchill Pocketbooks) By Andrew T Raftery BSc MBChB(Hons) MD FRCS(Eng) FRCS(Ed), Eric KS Lim MB ChB MD MSc FRCS(C-Th), Andrew J K Ostor MB BS FRACP

Making a correct diagnosis is one of the key aspects of every medical student's and junior doctor's clinical training, and problem-based learning is now widely used to focus on the causes behind the presentation of a clinical feature. The **Fourth Edition** of this best-selling book is packed full of information to help the reader move from a presenting problem to an accurate diagnosis.

- This Fourth Edition covers 127 common presenting problems in both medicine and surgery in a consistent format.
- Each topic includes a list of all potential causes of the condition, colour coded to indicate common, occasional or rare causes. Important geographical variations are also highlighted.
- Two sections cover the differential diagnosis of biochemical and haematological disorders which provide a ready check when reviewing abnormal results
- The text includes a targeted guide to the relevant general and specific follow-up investigations which should be carried out as appropriate.
- At the end of each topic a box highlights important learning points, or indicates symptom and signs suggestive of significant pathology which require urgent action.
- Eighty colour photographs of key clinical presentations have been added to assist symptom recognition.
- Two new chapters on Hypotension and Photophobia.
