## Ethics for International Business: Decision-Making in a Global Political Economy By John Kline

Business takes place in an increasingly global environment, crossing political and cultural boundaries that challenge corporate values. The central focus of this successful and innovative text lies in how to make and explain 'best choice' judgments when confronting ethical dilemmas in international business situations.

The newly-updated version of this groundbreaking textbook continues to provide a topical and relevant analysis of the ethical dimensions of conducting business in a global political economy. From a starting point of applied ethics, the book introduces a common set of normative terms and analytical tools for examining and discussing real case scenarios.

Extensive real-world examples, presented in the form of exhibits, cover issues including:

- foreign production, including sweatshops
- export of hazardous products
- testing and pricing of HIV-AIDS drugs
- advertising tobacco, alcoholic beverages and infant formula
- deceptive marketing techniques and bribery
- religious and social discrimination
- cultural impacts from 'music, movies and malls'
- environmental issues, including oil spills, rain forest preservation, global warming and genetically modified foods
- fair trade certification and consumer boycotts
- oil investments in the Sudan, Burma and Nigeria.

To keep pace with the changing landscape of global business, this new edition features:

- updated exhibits that introduce new issues, including internet censorship and privacy, marketing and obesity, dumping electronic waste in Ghana, the costs of bottled water, and Wal-Mart's supplier code in China

- increased coverage of issues arising in emerging markets
- updated descriptions and assessments of relevant international agreements
- seventeen new photographs that were chosen to accompany cases designed for classroom discussion
- "framing questions" to guide discussion of issues in topical chapters
- three additional figures that help depict the ethical analysis process.

The continued globalization of business increases the relevance of this textbook and its unique focus on specifically international ethical challenges faced by business, where governments and civil society groups play an active role. While most business ethics texts continue to focus heavily on ethical theory, this textbook condenses ethical theory into applied decision-making concepts, emphasizing practical applications to real world dilemmas.

Anyone with an interest in the ethical implications of international business, or the business implications of corporate responsibility in the global market, will find this book a thought-provoking yet balanced analysis. Clearly written, this has become the textbook of choice in this increasingly important field.

### Editorial Review

About the Author

**John M. Kline** is a Professor of International Business Diplomacy in the Walsh School of Foreign Service, Georgetown University. He is a past Director of the Master of Science in Foreign Service Program and the Karl F. Landegger Program in International Business Diplomacy. His teaching focuses on international business-government relations, international investment strategies and negotiations, and international business ethics.

In addition to Dr. Kline's textbook, *Ethics for International Business*, he is the author of three other books as well as numerous scholarly articles and chapters in co-authored and edited books.

Prior to joining the Georgetown faculty, Dr. Kline was Director of International Economic Policy at the National Association of Manufacturers. He received his doctorate in political science from The George Washington University and holds a masters degree in international relations from The Johns Hopkins University School of Advanced International Studies.

Dr. Kline serves as a consultant to various international organizations and private multinational corporations. He has conducted studies for the United Nations, the Inter-American Development Bank, the Organization for Economic Cooperation and Development, and the U.S. Advisory Committee on Intergovernmental Relations. His current projects include a comparative analysis for UNCTAD on foreign investment policy in electricity infrastructure reforms in Chile and New Zealand, and a faculty workshop at Instituto Tecnológico y de Estudios Superiores de Monterrey in Mexico on teaching business ethics.
