Editorial Review

From the Back Cover

The Ultimate JavaServer Faces Resource

Deliver feature-rich, cross-browser Internet applications using JavaServer Faces (JSF) and this one-stop guide. Written by experts directly involved in developing this important technology, *JavaServer Faces: The Complete Reference* fully explains every aspect of JSF.

The book begins with a fast-paced introduction so you can get your first JSF application up and running quickly. Then, each aspect of JSF is examined in depth, including the request processing lifecycle, page navigation, component development, AJAX, validation, internationalization, and security. Throughout, Expert Group Insights offer an insider's view into the design of JSF. Inside you'll find:

- Comprehensive coverage of the JSF lifecycle, managed beans, expression language (EL), the Faces event, UI component, and navigation models
- Techniques for transforming and processing data from disparate sources using converters and validators
- A complete, integrated sample application to use as a model for your own JSF applications, with code available online
- Instructions on how to use Hibernate to integrate JSF with production-quality databases
- Details on building AJAX-enabled custom UI components, complete with numerous examples
- Instructions for extending Faces by building custom non-UI components ranging from validators and converters to NavigationHandlers and ViewHandlers
- Techniques for debugging and developing automated software tests for JSF applications
- Extensive discussions of third-party Faces technologies, including MyFaces, ADF Faces, Facelets, Shale, and Faces-enabled IDEs
- Detailed coverage on security (using JAAS), accessibility, internationalization, and localization with JSF

About the Author

Chris Schalk is a principal product manager and lead JSF evangelist for Oracle's application server and development tools division.

Ed Burns is a senior staff engineer at Sun Microsystems, Inc., and has led the development of JavaServer Faces technology since its inception. He currently co-leads a team of experts from across the industry in the continued development of JSF.

James Holmes is a leading Java Web development authority. He is a committer on the Struts project and the author of *Struts: The Complete Reference*.

Edited by **Herbert Schildt**, Java authority and bestselling author of *Java: The Complete Reference*.

Users Review

From reader reviews:

James Sharpton:

The book JavaServer Faces: The Complete Reference (Complete Reference Series) make you feel enjoy for your spare time. You can use to make your capable far more increase. Book can to become your best friend when you getting pressure or having big problem with your subject. If you can make reading through a book JavaServer Faces: The Complete Reference (Complete Reference Series) to become your habit, you can get more advantages, like add your current capable, increase your knowledge about some or all subjects. You can know everything if you like wide open and read a guide JavaServer Faces: The Complete Reference (Complete Reference Series). Kinds of book are several. It means that, science book or encyclopedia or others. So , how do you think about this reserve?

Floyd Hatfield:

Information is provisions for people to get better life, information nowadays can get by anyone in everywhere. The information can be a information or any news even a concern. What people must be consider if those information which is in the former life are challenging be find than now's taking seriously which one would work to believe or which one typically the resource are convinced. If you obtain the unstable resource then you obtain it as your main information you will see huge disadvantage for you. All those possibilities will not happen within you if you take JavaServer Faces: The Complete Reference (Complete Reference Series) as the daily resource information.

Lashunda McCloud:

The book with title JavaServer Faces: The Complete Reference (Complete Reference Series) possesses a lot of information that you can discover it. You can get a lot of gain after read this book. This particular book exist new information the information that exist in this reserve represented the condition of the world right now. That is important to yo7u to find out how the improvement of the world. This particular book will bring you inside new era of the globalization. You can read the e-book on the smart phone, so you can read this anywhere you want.

Francis Lopez:

As a pupil exactly feel bored to help reading. If their teacher questioned them to go to the library or to make summary for some guide, they are complained. Just tiny students that has reading's heart or real their leisure activity. They just do what the trainer want, like asked to go to the library. They go to generally there but nothing reading very seriously. Any students feel that reading is not important, boring and also can't see colorful pictures on there. Yeah, it is to get complicated. Book is very important in your case. As we know that on this period of time, many ways to get whatever you want. Likewise word says, ways to reach Chinese's country. Therefore , this JavaServer Faces: The Complete Reference (Complete Reference Series) can make you really feel more interested to read.
