Modern Compressible Flow: With Historical Perspective By John Anderson

Anderson's book provides the most accessible approach to compressible flow for Mechanical and Aerospace Engineering students and professionals. In keeping with previous versions, the 3rd edition uses numerous historical vignettes that show the evolution of the field. New pedagogical features--"Roadmaps" showing the development of a given topic, and "Design Boxes" giving examples of design decisions--will make the 3rd edition even more practical and user-friendly than before. The 3rd edition strikes a careful balance between classical methods of determining compressible flow, and modern numerical and computer techniques (such as CFD) now used widely in industry & research. A new Book Website will contain all problem solutions for instructors.

Editorial Review

About the Author

John D. Anderson, Jr., was born in Lancaster, Pennsylvania, on October 1, 1937. He attended the University of Florida, graduating in 1959 with high honors and a Bachelor of Aeronautical Engineering Degree. From 1959 to 1962, he was a Lieutenant and Task Scientist at the Aerospace Research Laboratory at Wright-Patterson Air Force Base. From 1962 to 1966, he attended the Ohio State University under the National Science Foundation and NASA Fellowships, graduating with a PhD in Aeronautical and Astronautical Engineering. In 1966, he joined the U.S. Naval Ordnance Laboratory as Chief of the Hypersonics Group. In 1973, he became Chairman of the Department of Aerospace Engineering at the University of Maryland, and since 1980 has been Professor of Aerospace Engineering at the University of Maryland. In 1982, he was designated a Distinguished Scholar/Teacher by the University. During 1986–1987, while on sabbatical from the University, Dr. Anderson occupied the Charles Lindbergh Chair at the National Air and Space Museum of the Smithsonian Institution. He continued with the Air and Space Museum one day each week as their Special Assistant for Aerodynamics, doing research and writing on the History of Aerodynamics. In addition to his position as Professor of Aerospace Engineering, in 1993, he was made a full faculty member of the Committee for the History and Philosophy of Science and in 1996 an affiliate member of the History Department at the University of Maryland. In 1996, he became the Glenn L. Martin Distinguished Professor for Education in Aerospace Engineering. In 1999, he retired from the University of Maryland and was appointed Professor Emeritus. He is currently the Curator for Aerodynamics at the National Air and Space Museum, Smithsonian Institution.

Users Review

From reader reviews:

Graciela Johnson:

Nowadays reading books become more than want or need but also become a life style. This reading addiction give you lot of advantages. Associate programs you got of course the knowledge your information inside the book in which improve your knowledge and information. The information you get based on what kind of book you read, if you want attract knowledge just go with schooling books but if you want feel happy read one along with theme for entertaining including comic or novel. Often the Modern Compressible Flow: With Historical Perspective is kind of publication which is giving the reader unstable experience.

Judy Bowen:

The book Modern Compressible Flow: With Historical Perspective will bring one to the new experience of reading a book. The author style to explain the idea is very unique. In case you try to find new book you just read, this book very appropriate to you. The book Modern Compressible Flow: With Historical Perspective is much recommended to you to learn. You can also get the e-book through the official web site, so you can more readily to read the book.

Michael Fischer:

In this particular era which is the greater particular person or who has ability in doing something more are more special than other. Do you want to become considered one of it? It is just simple method to have that. What you need to do is just spending your time not very much but quite enough to experience a look at some books. Among the books in the top checklist in your reading list is definitely Modern Compressible Flow: With Historical Perspective. This book which is qualified as The Hungry Mountains can get you closer in turning into precious person. By looking up and review this reserve you can get many advantages.

Marcella Baird:

What is your hobby? Have you heard that will question when you got pupils? We believe that that issue was given by teacher on their students. Many kinds of hobby, Every individual has different hobby. And also you know that little person just like reading or as looking at become their hobby. You must know that reading is very important as well as book as to be the factor. Book is important thing to provide you knowledge, except your own personal teacher or lecturer. You see good news or update concerning something by book. Amount types of books that can you choose to use be your object. One of them is Modern Compressible Flow: With Historical Perspective.
