### The Geographical Tradition: Episodes in the History of a Contested Enterprise By David Livingstone

*The Geographical Tradition* presents the history of an essentially contested tradition. By examining a series of key episodes in geography's history since 1400, Livingstone argues that the messy contingencies of history are to be preferred to the manufactured idealizations of the standard chronicles. Throughout, the development of geographical thought and practice is portrayed against the background of the broader social and intellectual contexts of the times. Among the topics investigated are geography during the Age of Reconnaissance, the Scientific Revolution and The Enlightenment; subsequently geography's relationships with Darwinism, imperialism, regionalism, and quantification are elaborated.
