**Appleton & Lange's Outline Review Clinical Chemistry** By Robert Christenson, Linda Gregory, Lisa Johnson, Gershon Shugar, B.S. John E Hutton III, MT Lisa J. Johnson MHS, University of Maryland Medical System, Baltimore, Maryland Robert Christensen Ph.D.

This is the first book in a series that serves the dual purpose of preparing students of CLS programs for certification exams and giving cross training skills to established clinical lab scientists who now find themselves called on to work in other areas of the lab. This book uses a building block approach to convey the material in a logical fashion. Starting with an overview of medicine and the medical laboratory's relationship, the text proceeds to the diagnostic value of those analytes normally associated with clinical chemistry, on to technologies of analysis, quality assurance, and statistical analysis of laboratory data. A&L Outline Review of Clinical Chemistry makes it easy to optimize your study sessions and use your time efficiently, and helps you quickly locate key concepts. This PREP guide provides pretests to help you identify areas for extra attention, and gives you what you need to know in an easy-to-remember format, packed with study-enhancing devices such as illustrations and learning objectives.
