Fertility Pastures By Newman Turner

Newman Turner details his methods of intensive pasture-based production of beef and dairy cows in a practical guide to profitable, labor-saving livestock production. He developed a system of complex herbal ley mixtures, or blends of pasture grasses and herbs, with each ingredient chosen to perform an essential function in providing a specific nutrient to the animal or enhancing the fertility of the soil. He explains his methods of cultivation, seeding and management.

There are also chapters on year-round grazing, making silage for self-feeding, protein from forage crops and pastures for pigs and poultry. He also details the roles individual herbs play in the prevention and treatment of disease.

Editorial Review

About the Author

Frank Newman Turner was one of the founders of the modern environmental movement and published some of the first organic farming and gardening magazines. He founded *The Farmer*, the first organic quarterly magazine published and edited from the farm, became a founding council member of the Soil Association, the U.K.'s leading regulator of organic standards, and served as president of an early organic horticultural organization. As a farmer, he received numerous awards in animal breeding and horticulture. A true visionary, many of his agricultural innovations are only now being rediscovered by the new wave of organic farms and graziers.
