Physics for Scientists and Engineers with Modern Physics, Extended Version Chapters 1-46 (with PhysicsNow and InfoTrac) By Raymond A. Serway, John W. Jewett

This best-selling, calculus-based text is recognized for its carefully crafted, logical presentation of the basic concepts and principles of physics. PHYSICS FOR SCIENTISTS AND ENGINEERS, Sixth Edition, maintains the Serway traditions of concise writing for the students, carefully thought-out problem sets and worked examples, and evolving educational pedagogy. This edition introduces a new co-author, Dr. John Jewett, at Cal Poly - Pomona, known best for his teaching awards and his role in the recently published PRINCIPLES OF PHYSICS, Third Edition, also written with Ray Serway. Providing students with the tools they need to succeed in introductory physics, the Sixth Edition of this authoritative text features unparalleled media integration and a newly enhanced supplemental package for instructors and students!

Editorial Review

Review

"Prior to the adoption of this book (PHYSICS FOR SCIENTISTS AND ENGINEERS, 5th edition), the textbook was FUNDAMENTALS OF PHYSICS by Halliday and Resnick. Although Halliday and Resnick's book was the textbook chosen by the Physics Department, many students were observed by the faculty to be studying from Serway's book. The students had acquired old used versions of the Serway book, and they were actively studying out of this book rather than the prescribed textbook. Serway's book became our students' popular choice. The Physics Department, recognizing this, adopted a "give them what they want" attitude, and accordingly Serway's book was made the textbook for the calculus-based undergraduate physics course."

"Some of the general things I look for are the end-of-chapter questions and problems, and the quality of explanations. Feedback from students is also important--past students have given Serway more favorable reviews...another reason we went with Serway this semester."

"Quick Quizzes are a really good component. Pitfall Preventions answered a number of my criticisms of the text. I am very pleased with the overall emphasis on conceptual understanding. I have been very pleased with Serway. I have no expectations of switching texts in the near future."

"Would I use this text for my classes, both Engineers and Honors students? I certainly would."

"Finally, I would like to add that my son is taking high school physics. He is using the non-calculus version of the text. He likes the book and he tells me that his fellow students do also."

About the Author

Raymond A. Serway received his doctorate at Illinois Institute of Technology and is Professor Emeritus at James Madison University. In 2011, he was awarded an honorary doctorate degree from his alma mater, Utica College. He received the 1990 Madison Scholar Award at James Madison University, where he taught for 17 years. Dr. Serway began his teaching career at Clarkson University, where he conducted research and taught from 1967 to 1980. He was the recipient of the Distinguished Teaching Award at Clarkson University in 1977 and the Alumni Achievement Award from Utica College in 1985. As Guest Scientist at the IBM Research Laboratory in Zurich, Switzerland, he worked with K. Alex Müller, 1987 Nobel Prize recipient. Dr. Serway also was a visiting scientist at Argonne National Laboratory, where he collaborated with his mentor and friend, the late Sam Marshall. In addition to PHYSICS FOR SCIENTISTS AND ENGINEERS, Dr. Serway is the coauthor of PRINCIPLES OF PHYSICS, Fifth Edition; COLLEGE PHYSICS, Ninth Edition; ESSENTIALS OF COLLEGE PHYSICS; MODERN PHYSICS, Third Edition; and the high school textbook PHYSICS, published by Holt McDougal. In addition, Dr. Serway has published more than 40 research papers in the field of condensed matter physics and has given more than 60 presentations at professional meetings. Dr. Serway and his wife Elizabeth enjoy traveling, playing golf, fishing, gardening, singing in the church choir, and especially spending quality time with their four children, nine grandchildren, and a recent great-grandson.

John W. Jewett, Jr., earned his undergraduate degree in physics at Drexel University and his doctorate at Ohio State University, specializing in optical and magnetic properties of condensed matter. Dr. Jewett began his academic career at Richard Stockton College of New Jersey, where he taught from 1974 to 1984. He is

currently Emeritus Professor of Physics at California State Polytechnic University, Pomona. Through his teaching career, Dr. Jewett has been active in promoting science education. In addition to receiving four National Science Foundation grants, he helped found and direct the Southern California Area Modern Physics Institute (SCAMPI) and Science IMPACT (Institute for Modern Pedagogy and Creative Teaching). Dr. Jewett's honors include the Stockton Merit Award at Richard Stockton College in 1980, selection as Outstanding Professor at California State Polytechnic University for 1991-1992, and the Excellence in Undergraduate Physics Teaching Award from the American Association of Physics Teachers (AAPT) in 1998. In 2010, he received an Alumni Lifetime Achievement Award from Drexel University in recognition of his contributions in physics education. He has given over 100 presentations both domestically and abroad, including multiple presentations at national meetings of the AAPT. Dr. Jewett is the author of *THE WORLD OF PHYSICS: MYSTERIES, MAGIC, AND MYTH*, which provides many connections between physics and everyday experiences. In addition to his work on *PHYSICS FOR SCIENTISTS AND ENGINEERS*, he is the coauthor for *PRINCIPLES OF PHYSICS*, Fifth Edition, as well as *GLOBAL ISSUES*, a four-volume set of instruction manuals in integrated science for high school. Dr. Jewett enjoys playing keyboard with his all-physicist band, traveling, and collecting antique quack medical devices that can be used as demonstration apparatus in physics lectures. Most importantly, he relishes spending time with his wife Lisa and their children and grandchildren.

Users Review

From reader reviews:

Catherine Crider:

Nowadays reading books are more than want or need but also be a life style. This reading behavior give you lot of advantages. The huge benefits you got of course the knowledge the actual information inside the book in which improve your knowledge and information. The details you get based on what kind of guide you read, if you want send more knowledge just go with training books but if you want truly feel happy read one along with theme for entertaining such as comic or novel. The *Physics for Scientists and Engineers with Modern Physics, Extended Version Chapters 1-46 (with PhysicsNow and InfoTrac)* is kind of publication which is giving the reader erratic experience.

Dwight Ivers:

The book untitled *Physics for Scientists and Engineers with Modern Physics, Extended Version Chapters 1-46 (with PhysicsNow and InfoTrac)* contain a lot of information on the item. The writer explains your ex idea with easy method. The language is very easy to understand all the people, so do not really worry, you can easy to read the item. The book was written by famous author. The author will bring you in the new period of time of literary works. You can easily read this book because you can please read on your smart phone, or program, so you can read the book with anywhere and anytime. In a situation you wish to purchase the e-book, you can wide open their official web-site and order it. Have a nice examine.

Sandra Jordon:

Is it an individual who having spare time in that case spend it whole day through watching television programs or just laying on the bed? Do you need something totally new? This *Physics for Scientists and Engineers with Modern Physics, Extended Version Chapters 1-46 (with PhysicsNow and InfoTrac)* can be

the answer, oh how comes? A book you know. You are consequently out of date, spending your extra time by reading in this brand-new era is common not a geek activity. So what these books have than the others?

Kermit Moors:

What is your hobby? Have you heard in which question when you got learners? We believe that that issue was given by teacher for their students. Many kinds of hobby, All people has different hobby. And you know that little person just like reading or as studying become their hobby. You must know that reading is very important as well as book as to be the matter. Book is important thing to add you knowledge, except your personal teacher or lecturer. You get good news or update concerning something by book. A substantial number of sorts of books that can you choose to adopt be your object. One of them is this Physics for Scientists and Engineers with Modern Physics, Extended Version Chapters 1-46 (with PhysicsNow and InfoTrac).
