Environmental Analytical Chemistry, Volume 32 (Comprehensive Analytical Chemistry) By D. Pérez-Bendito, S. Rubio

Notwithstanding the vast amount of environmental analytical chemical literature available, publications dealing with environmental analytical chemistry in a general, integrated manner are rather scant. In fact, most literature on such a relevant topic appears to touch on individual aspects such as water or air pollution, applicable conventional or special equipment used with given matrices and specific pollutant groups. Most of these books are of interest to experts and only a few, if any, provide less experienced readers with a systematic, comprehensive description of environmental analytical issues. This book, which is intended to fill the gap, approaches the subject by focusing on the sample and its handling.

The fourteen chapters that make up the book follow a logical sequence of sample matrices and analyte types. The first six are of paramount importance, as they lay the foundations for a basic, yet comprehensive coverage of the subject in the others. Following the required introduction to environmental chemistry, Chapters 2 to 6 deal sequentially with environmental quality assurance, quality control fundamentals and practical aspects of environmental sampling, the preconcentration of environmental samples and environmental control standards. Chapters 7 to 12 are concerned with the analytical control of inorganic and organic pollutants in air, water and soil. Finally, the last two chapters are devoted to speciation and chemometrics in environmental analysis. Each chapter presents the state-of-the-art of the environmental topic covered, and illustrates it with a wealth of practical examples. Overall, the book contains about one hundred tables, almost two hundred figures and more than 1700 references, all of which make it a pedagogical, current reference work.

On the borderline between a textbook and a monograph, it is intended to be useful both as an academic text for the burgeoning number of undergraduate and postgraduate courses on the subject, as a reference book for those starting work in the environmental field and as a source of first-hand information on environmental science and its practical laboratory aspects.

Editorial Review

Users Review

From reader reviews:

Willard Callahan:

Why don't make it to be your habit? Right now, try to prepare your time to do the important behave, like looking for your favorite guide and reading a reserve. Beside you can solve your long lasting problem; you can add your knowledge by the publication entitled Environmental Analytical Chemistry, Volume 32 (Comprehensive Analytical Chemistry). Try to face the book Environmental Analytical Chemistry, Volume 32 (Comprehensive Analytical Chemistry) as your close friend. It means that it can to get your friend when you sense alone and beside regarding course make you smarter than previously. Yeah, it is very fortunated for you. The book makes you much more confidence because you can know every thing by the book. So , let's make new experience along with knowledge with this book.

Steven Stockton:

Information is provisions for anyone to get better life, information today can get by anyone on everywhere. The information can be a information or any news even an issue. What people must be consider when those information which is in the former life are challenging be find than now's taking seriously which one works to believe or which one often the resource are convinced. If you have the unstable resource then you obtain it as your main information we will see huge disadvantage for you. All of those possibilities will not happen with you if you take Environmental Analytical Chemistry, Volume 32 (Comprehensive Analytical Chemistry) as the daily resource information.

Edward Shaw:

Does one one of the book lovers? If yes, do you ever feeling doubt while you are in the book store? Try to pick one book that you never know the inside because don't evaluate book by its deal with may doesn't work at this point is difficult job because you are afraid that the inside maybe not since fantastic as in the outside appearance likes. Maybe you answer might be Environmental Analytical Chemistry, Volume 32 (Comprehensive Analytical Chemistry) why because the fantastic cover that make you consider about the content will not disappoint a person. The inside or content is usually fantastic as the outside or perhaps cover. Your reading 6th sense will directly show you to pick up this book.

Linda Doyle:

Don't be worry if you are afraid that this book will certainly filled the space in your house, you can have it in e-book approach, more simple and reachable. That Environmental Analytical Chemistry, Volume 32

(Comprehensive Analytical Chemistry) can give you a lot of pals because by you considering this one book you have matter that they don't and make you actually more like an interesting person. This book can be one of one step for you to get success. This publication offer you information that possibly your friend doesn't understand, by knowing more than different make you to be great individuals. So , why hesitate? Let's have Environmental Analytical Chemistry, Volume 32 (Comprehensive Analytical Chemistry).
