Foundations of Modern Macroeconomics By Ben J. Heijdra

Highlights of this new edition:

- Chapters substantially revised to reflect current thinking in macroeconomics
- Includes 31 boxed case studies that are easily cross-referenced
- New material added and empirical data updated to better reflect labor market developments during the last three decades
- Streamlined mathematical appendix

Advanced macroeconomics can seem a daunting prospect. Complex and poorly defined, infected with a variety of conflicting approaches, it is difficult for the student to get an overall picture of what there is and how it fits in. *Foundations of Modern Macroeconomics* is aimed at getting around this fundamental problem: it deals with all the major topics, summarizes the important approaches, and gives students a coherent angle on all aspects of macroeconomic thought. Each chapter deals with a separate area of macroeconomics, and each contains a summary section of key points and a further reading list, enabling the student to check what has been learnt and investigate further in other books.

Editorial Review

Review

Review from previous edition: "This book will be an extremely valuable addition to the reading list for core graduate macroeconomics courses. It provides a fair and balanced account of the different schools of macroeconomic thought and the current state of the discipline. A large number of topics are treated; the sections which cover technical material are particularly praiseworthy. The authors convey a sense of enthusiasm about the subject and show that macroeconomics can, indeed, be exciting."

--Professor John Fender, University of Birmingham

"This is a good addition to the textbook market. The coverage of topics is comprehensive and it takes students from an intermediate to graduate level with commendable ease."

--Shaun Hargreaves Heap, University of East Anglia

About the Author

Ben J. Heijdra is Professor of Economics at the University of Groningen. Professor Heijdra is also a Visiting Research Professor at the Institute for Advanced Studies (Institut für Höhere Studien) in Vienna, and a Fellow of the CESifo Research Network (Munich). His research focuses on policy-relevant theoretical macroeconomics.

Users Review

From reader reviews:

Deborah Green:
