Mankind Child of the Stars By Max H Flindt

Is Earth a colony established by creatures from Outerspace? Scientific evidence to prove that mankind could not possibly evolved naturally. Step by step clues that explore the very real possibility that we are direct descendants of ancient starmen who came from other planets to Earth millions of years ago. Some of the fascinating discoveries revealed in this book:* Earth has been visited more than 5,000 times by creatures from other planets! * There's evidence that starmen deliberately hid any "Missing Link" human fossils in order to keep mankind from knowing it was a colony! * There is a reason to believe that the starmen were the "Angels" of the Bible, carrying on a "Divine" mission to bring human life to Earth! Max H. Flindt was the first to scientifically document from biological evidence the possibility that mankind may be a hybrid from a prehistoric union of terrestrial humanoids and starmen. With a 180,000 copies previously sold, this new Edition of "Mankind" offers a whole new generation a look at these mind-expanding theories.

Editorial Review

From the Publisher

EARTH HAS BEEN VISITED MORE THAN 5,000 TIMES BY CREATURES FROM OTHER PLANETS!!!

This Book provides Scientific evidence to support this theory!!!!

With 180,000 copies previously sold, this NEW EDITION of Mankind offers a whole new generation a look at these mind-expanding theories!!!

About the Author

Max H. Flindt Born in 1915 in San Jose, California. The son of pioneer science-fiction writer, Homer Eon Flindt. Ardent studies in chemistry, physics, biology, paleontology, and anthropology led him to a life dedicated to independent scientific research. Former posts include that of Senior Laboratory Technician under Nobelists Dr. Edward Teller, Dr. Glenn Seaborg, and Dr. Melvin Calvin at Lawrence Radiation Laboratory, Berkeley, California; Laboratory Analyst in Research at Lockheed, where he engaged in highly classified space research; and research on human blood anomalies under the late Professor Emeritus Percival Baumberger of Stanford University. Flindt was the first to scientifically document from biological evidence the possibility that mankind may be a hybrid from a prehistoric union of terrestrial humanoids and starmen, which is this book's main thesis. He privately published a pamphlet entitled "On Tiptoe Beyond Darwin" (copyright 1962), which was later expanded to short book length (copyright 1965). The present book is a greatly expanded version, with much additional scientific data to further substantiate this concept. 180,000 copies were sold in the paperback edition in the 1970's. We are sorry to say that Max passed over in October of 2004. We hope you enjoy his work. **Otto O. Binder** Born 1911, Bessmer, Michigan - Died 1974 Three years college: City College of Chicago, University of Illinois, Northwestern University; majored in chemical engineering. First published story, 1932 (fiction). Over three million words published in fiction, including science fiction. Over forty books published, including "Victory in Space", "Careers in Space", and such astronomical texts as "The Moon, The Planets, Riddles of Astronomy", all for school circulation. Under NASA contract in 1966, wrote the Mercury, Gemini, and Apollo programs in chart form for educational purposes. Two UFO books published: "Flying Saucers are Watching Us" by Belmont Books - 1969 (reissue)

Users Review

From reader reviews:

Rodney Sierra:

The book Mankind Child of the Stars can give more knowledge and also the precise product information about everything you want. Exactly why must we leave a good thing like a book Mankind Child of the Stars? Some of you have a different opinion about e-book. But one aim that will book can give many information for us.
