Numerical Solution of Elliptic and Parabolic Partial Differential Equations with CD-ROM By John A. Trangenstein

For mathematicians and engineers interested in applying numerical methods to physical problems this book is ideal. Numerical ideas are connected to accompanying software, which is also available online. By seeing the complete description of the methods in both theory and implementation, students will more easily gain the knowledge needed to write their own application programs or develop new theory. The book contains careful development of the mathematical tools needed for analysis of the numerical methods, including elliptic regularity theory and approximation theory. Variational crimes, due to quadrature, coordinate mappings, domain approximation and boundary conditions, are analyzed. The claims are stated with full statement of the assumptions and conclusions, and use subscripted constants which can be traced back to the origination (particularly in the electronic version, which can be found on the accompanying CD-ROM).

Numerical Solution of Elliptic and Parabolic Partial Differential Equations with CD-ROM By John A. Trangenstein **Bibliography**

- Sales Rank: #712903 in Books
- Brand: Brand: Cambridge University Press
- Published on: 2013-05-27
- Original language: English
- Number of items: 1
- Dimensions: 9.69" h x 1.46" w x 7.44" l, 3.10 pounds
- Binding: Hardcover
- 661 pages

Editorial Review

About the Author

John A. Trangenstein is Professor of Mathematics and Adjunct Professor of Civil and Environmental Engineering at Duke University, North Carolina, USA.

Users Review

From reader reviews:

Andrew Waite:

The book Numerical Solution of Elliptic and Parabolic Partial Differential Equations with CD-ROM will bring one to the new experience of reading a book. The author style to explain the idea is very unique. In the event you try to find new book you just read, this book very appropriate to you. The book Numerical Solution of Elliptic and Parabolic Partial Differential Equations with CD-ROM is much recommended to you to learn. You can also get the e-book from official web site, so you can quickly to read the book.

Phillip Permenter:

Spent a free a chance to be fun activity to accomplish! A lot of people spent their leisure time with their family, or their own friends. Usually they performing activity like watching television, planning to beach, or picnic inside park. They actually doing same every week. Do you feel it? Will you something different to fill your current free time/ holiday? May be reading a book could be option to fill your totally free time/ holiday. The first thing you ask may be what kinds of guide that you should read. If you want to try look for book, may be the e-book untitled Numerical Solution of Elliptic and Parabolic Partial Differential Equations with CD-ROM can be very good book to read. May be it could be best activity to you.

Pablo Bussey:

Many people spending their time frame by playing outside together with friends, fun activity having family or just watching TV all day every day. You can have new activity to shell out your whole day by reading a book. Ugh, do you consider reading a book will surely hard because you have to take the book everywhere? It okay you can have the e-book, delivering everywhere you want in your Smartphone. Like Numerical Solution of Elliptic and Parabolic Partial Differential Equations with CD-ROM which is getting the e-book version. So , try out this book? Let's notice.

Travis Davis:

That publication can make you to feel relax. This particular book Numerical Solution of Elliptic and Parabolic Partial Differential Equations with CD-ROM was vibrant and of course has pictures on there. As

we know that book Numerical Solution of Elliptic and Parabolic Partial Differential Equations with CD-ROM has many kinds or category. Start from kids until teens. For example Naruto or Private eye Conan you can read and feel that you are the character on there. Therefore , not at all of book are usually make you bored, any it makes you feel happy, fun and rest. Try to choose the best book for you and try to like reading in which.
