Research Methodology: A Guide for Researchers In Agricultural Science, Social Science and Other Related Fields By Pradip Kumar Sahu

This book is the outcome of more than 20 years of experience of the author in teaching and research field. The wider scope and coverage of the book will help not only the students/ researchers/professionals in the field of agriculture and allied disciplines, but also the researchers and practitioners in other fields. Written in simple and lucid language, the book would appeal to all those who are meant to be benefitted out of it. All efforts have been made to present "RESEARCH", its meaning, intention and usefulness. The book reflects current methodological techniques used in interdisciplinary research, as illustrated with many relevant worked out examples. Designing of research programme, selection of variables, collection of data and their analysis to interpret the data are discussed extensively. Statistical tools are complemented with real-life examples, making the otherwise complicated subject like statistics seem simpler. Attempts have been made to demonstrate how a user can solve the problems using simple computer-oriented programme. Emphasis is placed not only on solving the problems in various fields but also on drawing inferences from the problems. The importance of instruments and computers in research processes and statistical analyses along with their misuse/incorrect use is also discussed to make the user aware about the correct use of specific technique. In all the chapters, theories are combined with examples, and steps are enumerated to follow the correct use of the available packages like MSEXCELL, SPSS, SPAR1, SAS etc. Utmost care has been taken to present varied range of research problems along with their solutions in agriculture and allied fields which would be of immense use to readers.

So now let us explain to you the relaxing pattern is your body and mind will probably be pleased when you are finished reading through it, like winning a casino game. Do you want to try this extraordinary investing spare time activity?

Doris Blair:

Reading a book to become new life style in this season; every people loves to read a book. When you read a book you can get a large amount of benefit. When you read books, you can improve your knowledge, simply because book has a lot of information into it. The information that you will get depend on what types of book that you have read. If you would like get information about your examine, you can read education books, but if you act like you want to entertain yourself look for a fiction books, these kinds of us novel, comics, as well as soon. The Research Methodology: A Guide for Researchers In Agricultural Science, Social Science and Other Related Fields provide you with new experience in looking at a book.

Virginia Kang:

As a university student exactly feel bored in order to reading. If their teacher asked them to go to the library or make summary for some reserve, they are complained. Just very little students that has reading's soul or real their interest. They just do what the educator want, like asked to go to the library. They go to at this time there but nothing reading seriously. Any students feel that looking at is not important, boring and also can't see colorful pictures on there. Yeah, it is for being complicated. Book is very important for you personally. As we know that on this period, many ways to get whatever we want. Likewise word says, ways to reach Chinese's country. Therefore this Research Methodology: A Guide for Researchers In Agricultural Science, Social Science and Other Related Fields can make you really feel more interested to read.
