**The Cosmos: Astronomy in the New Millennium (with AceAstronomy™, Virtual Astronomy Labs Printed Access Card)** By Jay M. Pasachoff, Alex Filippenko

Jay Pasachoff and Alex Filippenko combine extensive research experience, teaching experience, and textbook-writing experience to offer a book that is unparalleled in its ability to present the latest science in a way that students can understand. This brief, beautifully illustrated text - one of the briefest available for the course - offers concise coverage of a wide range of astronomical topics. The authors have struck a balance between the fundamental concepts and the exciting topics at the forefront of astronomy, conveying the spirit of contemporary astronomy within a big picture context. The authors emphasize the central theme of origins in this text, first by singling out specifics in the headings of each chapter and then by dealing with a variety of relevant material in the text itself. An early discussion of the scientific method stresses an importance on the verification of observations, and sets the stage for the text's consistent focus on astronomy as a science.

## **Editorial Review**

### About the Author

Jay M. Pasachoff is Field Memorial Professor of Astronomy at Williams College, where he teaches the astronomy survey course and works with undergraduate students. He is also Director of the Hopkins Observatory there. Pasachoff has observed 35 solar eclipses and is Chair of the Working Group on Solar Eclipses of the International Astronomical Union. He is part of a group of scientists observing the atmosphere of Pluto through stellar occultations. He also works in radio astronomy, concentrating on cosmic deuterium and its consequences for cosmology. Further, he collaborates with an art historian on images of comets, the Moon, and eclipses. Pasachoff is U.S. National Liaison to the Commission on Astronomical Education and Development of the International Astronomical Union and is also Vice-President of the Commission. He has twice been Chair of the Astronomy Division of the American Association for the Advancement of Science, and he has been on the astronomy education committees of the American Astronomical Society, the American Physical Society, and the American Association of Physics Teachers. He is on the Council of Advisors of the Astronomy Education Review, the on-line journal sponsored by the American Astronomical Society and the Astronomical Society of the Pacific. In addition to his college astronomy texts, Pasachoff has written the PETERSON FIELD GUIDE TO THE STARS AND PLANETS, and is author or co-author of textbooks in calculus and in physics as well as several junior-high-school textbooks. Pasachoff received his undergraduate and graduate degrees from Harvard and was at Caltech before going to Williams College. His sabbaticals and other leaves have been taken at the University of Hawaii's Institute for Astronomy, the Institut d'Astrophysique in Paris, the Institute for Advanced Study in Princeton, and the Harvard-Smithsonian Center for Astrophysics. Pasachoff has been awarded the 2003 Education Prize of the American Astronomical Society.

Alex Filippenko was recently awarded the 2006 Professor of the Year award by the Council for Advancement and Support of Education for his introductory astronomy course. He is a Professor of Astronomy at the University of California, Berkeley, having joined the faculty in 1986. He received his bachelor's degree in Physics from the University of California, Santa Barbara (1979), and his doctorate in Astronomy from the California Institute of Technology (1984). An observational astronomer who makes frequent use of the Hubble Space Telescope and the Keck 10-meter telescopes, Filippenko has also developed a completely robotic telescope that obtains data while he sleeps. He also made major contributions to the discovery that the expansion rate of the Universe is speeding up with time, driven by a mysterious form of dark energy--the top "Science Breakthrough of 1998," according to the editors of Science magazine. Filippenko's research accomplishments have been recognized with several major awards, including the Newton Lacy Pierce Prize of the American Astronomical Society (1992) and the Robert M. Petrie Prize of the Canadian Astronomical Society (1997). A Fellow of the California Academy of Sciences, he has also been a Guggenheim Foundation Fellow (2001) and a Phi Beta Kappa Visiting Scholar (2002). In 1991 he won the two most coveted teaching awards at Berkeley. He has played a prominent role in science newscasts and television documentaries such as "Mysteries of Deep Space," "Stephen Hawking's Universe," and "Runaway Universe."

## **Users Review**

### **From reader reviews:**

**Martha Silva:**

Here thing why that The Cosmos: Astronomy in the New Millennium (with AceAstronomy™, Virtual Astronomy Labs Printed Access Card) are different and trusted to be yours. First of all looking at a book is good but it depends in the content of computer which is the content is as yummy as food or not. The Cosmos: Astronomy in the New Millennium (with AceAstronomy™, Virtual Astronomy Labs Printed Access Card) giving you information deeper including different ways, you can find any e-book out there but there is no publication that similar with The Cosmos: Astronomy in the New Millennium (with AceAstronomy™, Virtual Astronomy Labs Printed Access Card). It gives you thrill reading through journey, its open up your own personal eyes about the thing that happened in the world which is perhaps can be happened around you. You can actually bring everywhere like in recreation area, café, or even in your technique home by train. Should you be having difficulties in bringing the paper book maybe the form of The Cosmos: Astronomy in the New Millennium (with AceAstronomy™, Virtual Astronomy Labs Printed Access Card) in e-book can be your alternative.

**Harold Riggs:**

The feeling that you get from The Cosmos: Astronomy in the New Millennium (with AceAstronomy™, Virtual Astronomy Labs Printed Access Card) is a more deep you digging the information that hide within the words the more you get enthusiastic about reading it. It doesn't mean that this book is hard to comprehend but The Cosmos: Astronomy in the New Millennium (with AceAstronomy™, Virtual Astronomy Labs Printed Access Card) giving you joy feeling of reading. The writer conveys their point in particular way that can be understood through anyone who read the item because the author of this book is well-known enough. This specific book also makes your current vocabulary increase well. That makes it easy to understand then can go to you, both in printed or e-book style are available. We propose you for having that The Cosmos: Astronomy in the New Millennium (with AceAstronomy™, Virtual Astronomy Labs Printed Access Card) instantly.

**Sandy Reid:**

A lot of people always spent their particular free time to vacation or perhaps go to the outside with them friends and family or their friend. Did you know? Many a lot of people spent that they free time just watching TV, or even playing video games all day long. If you want to try to find a new activity honestly, that is look different you can read a book. It is really fun for you. If you enjoy the book that you just read you can spent 24 hours a day to reading a publication. The book The Cosmos: Astronomy in the New Millennium (with AceAstronomy™, Virtual Astronomy Labs Printed Access Card) it is quite good to read. There are a lot of people who recommended this book. They were enjoying reading this book. In the event you did not have enough space bringing this book you can buy typically the e-book. You can m0ore simply to read this book through your smart phone. The price is not too expensive but this book possesses high quality.

**Maurice Neely:**

Beside this specific The Cosmos: Astronomy in the New Millennium (with AceAstronomy™, Virtual Astronomy Labs Printed Access Card) in your phone, it might give you a way to get closer to the new knowledge or data. The information and the knowledge you will got here is fresh from oven so don't always

be worry if you feel like an older people live in narrow small town. It is good thing to have The Cosmos: Astronomy in the New Millennium (with AceAstronomy™, Virtual Astronomy Labs Printed Access Card) because this book offers to you readable information. Do you occasionally have book but you do not get what it's about. Oh come on, that wil happen if you have this within your hand. The Enjoyable set up here cannot be questionable, including treasuring beautiful island. So do you still want to miss this? Find this book and read it from right now!
